

Copying a Dual Layer DVD in DVD Decrypter

This is by far the easiest way to make a perfect 1:1 copy of an original DVD. Of course you will need a Dual Layer (DVD9) disk and a DVD writer that will write to dual layer disks ☺

First we need to make sure decrypter is set up right for this. Open Decrypter and select “Tools” and then “Settings”

Now click on the “File Mode” tab and select “All” in the drop down box. Click on OK, and now we are ready to begin the process of making a 1:1 copy of your original DVD

[1] Put the original movie in your drive. Open DVD Decrypter and select ISO/Read R

[2] Browse to a place to save your image

[3] Click on write

[4] Once your done reading the original movie to your HD take it out and put a blank DVD R into your writer. Select ISO/Write W

[5] Now browse to where you saved your image on your HD

[6] Click on Write, and in a few minutes you will have a complete 1:1 back up of your original movie ☺
