

How to Burn your Image (ISO) file with DVD Decrypter

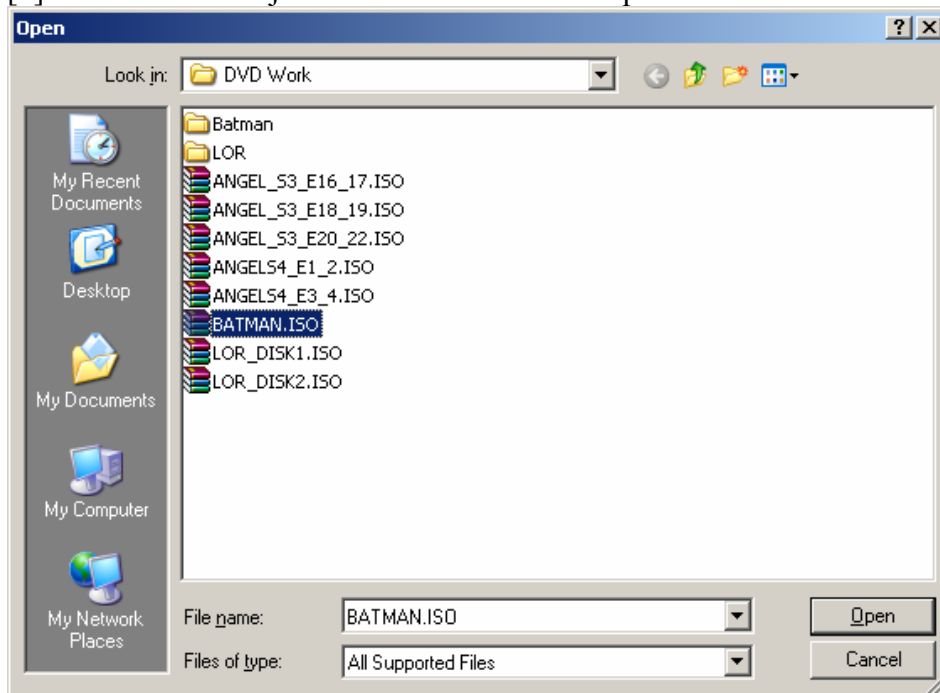

[1] Open up DVD Decrypter. Click on “Mode” then select “ISO” and “Write W”

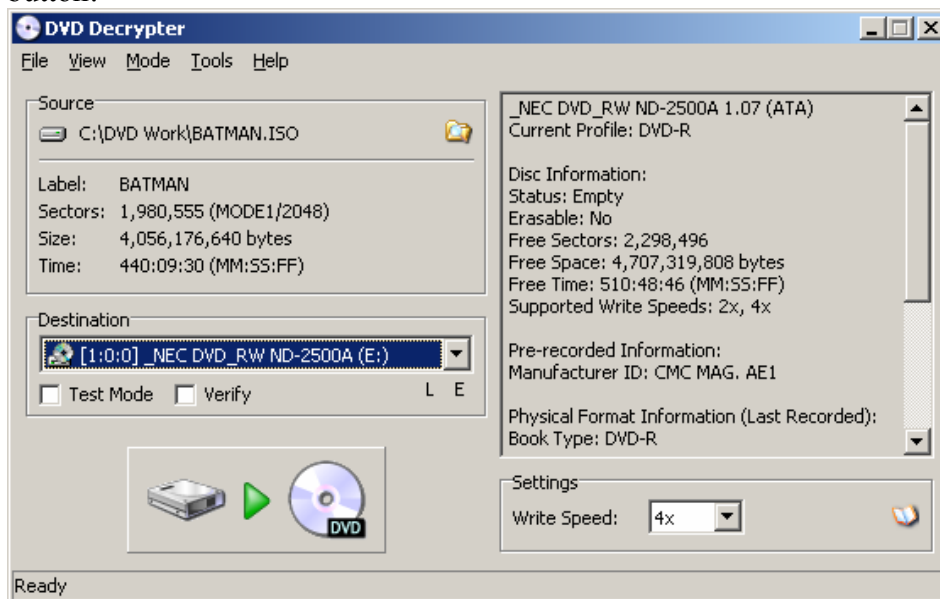

[2] Browse to where your image (ISO) file is on your hard drive by clicking on the little yellow folder

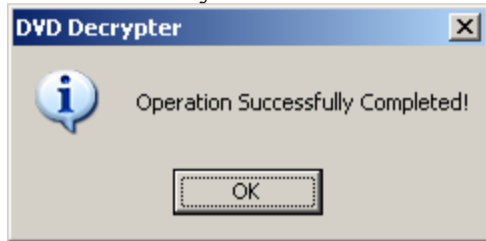

[3] There it is! Now just click on it and click “Open”

[4] Now just make sure under Destination your DVD writer is selected. Check your Write speed keep it under 8x I do all mine at 4x. Now all that's left to do is click on the write button!

You will know when Decrypter is done if you have your speakers turned on for sure. Other than that you will see this. Just click OK

That was easy enough wasn't it ☺ I sure hoped this helped you out...
